

VLITEX FIRE BLANKET

VLITEX

FIGHTING VEHICLE FIRES IN AN ENVIRONMENT- FRIENDLY WAY

VLITEX Car Fire Blankets Premium

Our fire blankets made of special glass fibre fabric are not only used for vehicle fires, but wherever fires need to be extinguished or contained in a resource-saving way and without great effort. Especially when electric cars catch fire, the extremely temperature-resistant blankets can quickly ensure safety: flames and heat remain under the blanket, smoke and the spread of toxic gases and particles are significantly reduced.

WHAT SETS VLITEX FIRE BLANKETS APART

- RELIABLE
- INTUITIV
- MULTI USE
- QUICK USE
- RESSOURCE-FRIENDLY
- ENVIRONMENT-FRIENDLY

PREMIUM M IS CERTIFIED FOR BATTERY FIRES!

WITHSTANDS
EXTREME
TEMPERATURES

HEAT RESISTANT
UP TO 1,000 °C

UP TO 1,300 °C
FOR SHORT
PERIODS

How VLITEX fire blankets work

Every day thousands of cars catch on fire. When extinguishing with conventional methods, toxins are released into the environment.

But there is another way. Fire blankets made from special glass fibre fabrics.

- isolate fires in a matter of seconds
- instantly reduce smoke production
- extinguish conventional fires in a short time
- reduce the spread of toxic particles
- protect surrounding objects
- keep the heat under the blanket

✓ proven in numerous field tests and deployments

✓ certified for the use in battery fires

VLITEX FIRE PROTECTION WITH GLASS FIBRE FABRIC

VLITEX car fire blanket Premium S

- Material**
- Base: 550 g/m² glass fibre fabric with silicone coating on both sides
 - Straps & Handles: Additional red silicone coating
 - Connection: Fire retardant sewing thread

Temperature resistance up to 660 °C - up to 1,000 °C for a short time

Maintenance & reusability Maintenance-free, multi-use (depending on condition after use)

- Use cases**
- For conventional fires
 - For vehicle fires, container fires and similar fires
 - Prevention for areas with many vehicles

Seizes & Weight S 6 x 8 m | ca. 25 kg

Accessoires like carrier bags and wall mounted storage are available for all blankets.

It's all in the details

Innovative folding technique

Innovatively folded, the blanket is quickly ready for use and can be placed over the burning object by two people.

Long handles for safe application

The long handles allow a large safety distance when covering an object with the blanket.

Option to release pyrolysis gases

Gases that accumulate under the blanket pose an explosion thread. Fire brigade can release them in a targeted manner.

EFFICIENT AND ENVIRONMENT-FRIENDLY.

VLITEX (electric) car fire blanket Premium M

Material	■ Base:	560 g/m ² special glass fibre fabric with silicone coating on both sides
	■ Straps & handles:	Additional red silicone coating
	■ Connection:	Fire retardant sewing thread
