

VLITEX FIRE BLANKET

VLITEX

EFFECTIVELY FIGHTING FIRES WITH SILICA

SPECIAL HIGH-TEMPERATURE FABRIC FOR SPECIFIC APPLICATIONS

The **VLITEX Superior**, featuring its pure silica fabric with a vermiculite coating, enhances safety by withstanding temperatures even higher than those generated by burning cars. For specialized needs, like containing fires in exposed battery modules, the **VLITEX Superior Pro** is the ideal choice.

TECHNICAL DATA

VLITEX Fire Blanket Superior

- strong silica fabric sewn with steel wire reinforced aramid
- Temperature resistance long-term 1.150 °C
- Temperature resistance peak 1.300 °C

VLITEX Fire Blanket Superior Pro

- extra strong silica fabric sewn with steel wire reinforced aramid
- Temperature resistance long-term 1.150 °C
- Temperature resistance peak 1.600 °C

Suitability: Containment of lithium-ion fires, smoke control, heat shielding

Usability: 25+ - Depending on the condition (cuts etc.) - material shrinks upon heat exposure

Sizes: Various standard dimensions for workshops, forklifts, or cars
