

# VLITEX FIRE BLANKETS

**VLITEX**

## THE SAFE SOLUTION FOR E-CAR TOWING

The VLITEX Service Set is patent pending.

### VLITEX Service Set Premium M

We have developed our extinguishing corner set especially for towing services and workshops: An easy-to-use, comparably inexpensive way to ensure safety during transport and storage of damaged e-cars.

- **ENVIRONMENTALLY FRIENDLY**
- **COST EFFECTIVE**
- **RELIABLE**
- **INTUITIVE**
- **MULTI USABLE**
- **IMMEDIATELY READY FOR USE**

## If an e-car is involved in an accident, towing services face special challenges

- Requires special training for handling high-voltage vehicles.
- A deformed battery poses a high fire risk.
- Safety via transport in (flooded) container - total write-off!
- Storage only with large distance to other objects - space problem!

## How can the VLITEX Service Set help?

retains leaking toxic liquids

protects surrounding objects in case of inflammation

reduces the smoke development significantly

## FIRE PROTECTION. ENVIRONMENTALLY FRIENDLY.

### Product data VLITEX Service Set Premium M

Material	Base:	560 g/m <sup>2</sup> glass fibre fabric with silicone coating on both sides
	Straps & Handles:	Additional red silicone coating
	Connection:	Fire-resistant sewing thread
Temperature resistance		Up to 1,000 °C - short-term up to 1,300 °C

Components Set		Top cover, bottom cover, fastening straps
Weight		49 kg
Pack size		80 x 36 x 32 cm

**VLITEX**

## Simple handling - powerful effect!

### Step 1

Spread out the bottom part of the blanket set and place the vehicle on it.

### Step 2

Protect the vehicle against scratches with the protective film. Place the top cover over the vehicle.

### Step 3

Fold up the lower cover and connect it with the fastening straps of the upper cover. Complete.

## THE ALTERNATIVE TO COMPLEX, EXPENSIVE CONTAINER SOLUTIONS!

We are convinced that our VLITEX fire blankets can make a valuable contribution to a safe future. Numerous tests by fire brigades or testing institutes confirm the performance.

- Conventional fires are smothered within a few minutes.
- Damaged e-cars are easy to secure and pose no danger to the environment during transport or storage.
- Battery fires are kept safely under the cover, no heat effects on the surroundings, smoke reduction.
- No contamination of the environment with toxic liquids or extinguishing agents containing harmful substances.
