Secure Information Management Policy

IDATOR SA is committed to the protection of information it manages within the context of its activities against any kind of internal, external, legitimate or unlawful threat, through the installation of an Information Security Management System comprised of policies, procedures and instructions.

The Company's Senior Management has set specific goals for the security of information it monitors and which it reviews, where necessary, in order to ensure:

- Protection of information against unauthorised access.
- Availability, integrity and confidentiality of the information it produces, receives and distributes within the context of its activities.
- Compliance with the legal and regulatory requirements that are related to information security.
- Continuous briefing and training of personnel on matters of information security management.
- Immediate recording and reporting of infringements and suspicious incidents to the Head of Management Systems and his/her in-depth investigation.
- Taking all required measures for preventing and dealing with security incidents.
- Fully satisfying the requirements of the stakeholders through continuous monitoring of the technological developments.
- Continuous improvement of the Information Security Management System.
- Full compliance with the requirements of the ISO/IEC 27001:2013 standard.

This Policy has been notified to all the human resources of IDATOR SA and is available to the interested parties. It is reviewed at regular intervals and is revised where necessary, in order to keep pace with developments.

On behalf of the Management

Mr Georgios Efstratiadis
